

Customize the new future

F100 series Compact Inverter

HTEK

ABOUT US

Hitek Electric Co., Ltd , also called Hitek for short, was founded in 1994. Located at Wenling, the youngest costal city in Taiwan, and well-known manufacturing base in Yangtze River Delta.

We are specialized in manufacturing inverter, our market share has been in the forefront of the industry, is well-known inverter manufacture who engaged in the development, manufacturing and marketing of industrial automation control products in Taiwan. We have 270 patented technologies and 21 software copyrights. The total building area of our factory is 35,000 square meters. And we have established three R&D centers in Taizhou, Hangzhou and Germany, sales network and after-sales service agencies have been throughout the main provinces and autonomous regions, exported to Europe and the United States, southeast Asia, Hitek always adheres to the service concept of quality and customer first. Depends on the advantages of technology research and marketing channels, Hitek more actively expands its product line, and improves the core competitiveness in the market continuously, and provides high-quality electrical products and personalized solutions for electric power, new energy, machinery manufacturing and other fields.

Driving Follow Heart, Winning The Future!

APPEARANCE INTRODUCTION

Compact & Flexible

F100 Series Compact Inverter

Based on the industrial application demand of high stability, small size and easy debugging,

Hitek has developed a new generation of compact inverter.

Support industry customization, widely used in woodworking machinery, fans and water pump, food filling, ceramic machinery, textile machinery and other equipment

PRODUCT APPEARANCE INTRODUCTION

Compact design, Customized interface

Easy detachable fan design

easy to replace, easy to clean, long life

Function Card

Press to remove it easily and can replace it with customized function card

⚠ Plug and unplug with power is strictly prohibited

Abundant display

LED keypad, LCD keypad

External operation panel

parameter copy, fault diagnosis, operation optimization, cloud connection

Independent air duct

Reliable heat dissipation high protection level

Customized terminal

Customization cost rationalization according to industry characteristics and customer demands

European terminal

no need special tools, easy connection, save time

PANEL INTRODUCTION

TECHNICAL SPECIFICATIONS

	Item	Description
Input	Rated voltage, frequency	three phase: 380V~440V, 50Hz/60Hz; single phase: 200V~240V, 50Hz/60Hz
	voltage operating range	three phase: 380V~440V, 50Hz/60Hz single phase: 200V~240V, 50Hz/60Hz Voltage unbalance rate: <3%; frequency: ±5%
Output	voltage	0-rated input voltage
	frequency	0Hz~1000Hz
	overload capacity	150% rated current 60s, 180% rated current 2s
main control performance	control mode	V/F/SVC
	modulation mode	Space vector PWM modulation
	motor type	asynchronous motor, synchronous motor, single motor (Please consult the manufacturer when using)
	start torque	0.5Hz/150% rated torque
	speed adjusting range	1:100(speed sensorless)
	frequency accuracy	digital setting: max. frequency ±0.01%; analog setting: max. frequency ±1%
	frequency resolution	digital setting: max. frequency ±0.01%; analog setting: max. frequency ±1%
	acceleration and deceleration curve	line/S-curve
	current limiting	Automatic current limitation during operation to prevent frequent over current fault tripping
	instant power down	Support instant stop non-stop, 1:100(speed sensorless)
operation function	command source	keypad, terminal, communication
	setting value source	digital, analog, multi-step speed, communication
	PID	support main setting+PID
Operation panel	protection function	over current, over voltage, under voltage, over heat, over load, phase loss, earth leakage, output short circuit protection, etc
	communication	MODBUS RTU
	digital tube display	output frequency, output current, output voltage, bus voltage, displayed value 1, displayed value 2, current alarm, current fault
Environment	external keypad	support
	applicable place	indoor, no direct sunlight, no dust, corrosive gas, combustible gas, oil mist, water vapor, water drop or salt, etc
	altitude	derating use if above 1000m, derating 10% for every 1000m increase.
	environment temperature	-10℃~+40℃ (derating use if environment temperature is 40℃~50℃)
	humidity	5%~90% RH, non-condensation
	store temperature	-40℃~+70℃
	vibration	less than 5.9m/s(0.6g)

EXCELLENT PERFORMANCE

Compatibility drive:

Applicable to asynchronous motor, synchronous motor and single motor

Adaptive vector control

Vector performance, VF convenience. The motor parameters are not sensitive and do not need self-learning.

Wide range vector control

Frequency range 0-1000Hz, applicable to more motors, and ensures high performance when running with high speed

High carrier frequency

Max. 16Hz, motor can work more quietly.

Fast current control

High dynamic response speed (15mS), fast start-up speed, small speed fluctuation.

The waveform of current, torque and speed when add load suddenly and unload with 2Hz 100% rated load

Bus voltage control:

Over-voltage control ensures deceleration at the fastest speed, magnetic flux braking realizes rapid deceleration when there is no braking resistor, and under-voltage control realizes non-stop function when instantaneous power-off.

current waveform of magnetic flux brake,
50Hz 100% rated load deceleration time is 0.1S

Instantaneous power non-stop waveform

POWERFUL FUNCTION

Easy to operate:

Select terminal source according to the required function, saving the number and type of terminal

Flexible function:

Flexible combination of setting values and commands, easily adapt to different applications

Abundant extended functions:

Provide various key-pad, communication, encoder, IO interface and other extension cards.

External operation panel type

Standard function card

Physical characteristics	Function Card

Typical applications												

Application customization:

Complex application functions can be realized by programming, and customized function call can be realized by application macro

Maintenance tools :

PC upper computer, mobile app and other tools provide perfect monitoring, configuration, optimization and diagnosis services

SOLID HARDWARE

Independent air duct:

No forced wind flows through the components, improving environmental adaptability.

Fast and tight protection:

Short circuit fault, input / output phase loss, overload, leakage, etc., fully protect the inverter and motor.

Integrated design:

Reduce the number of boards and flying wires, eliminate potential fault points with the greatest extent, and maximize performance the electrical and EMC with high-efficient.

Delicate heat dissipation design:

Compact size and easy installation.

Customization:

According to industry customization, remove redundant functions, cost is more reasonable, and quality is more stable.

SOME APPLICATIONS

Hitek F100 series inverter is widely used in textile machine, packing machine, carving machine, printing machine, solar water pump, food machinery, woodworking machinery, water pump fan and ceramic machinery, providing better solutions
